SPACE MONKEY

Protect your digital content and access it from anywhere

Features:

- 1 TB of cloud storage - It's enough space for all your digital content—photos, videos, documents, and music. It includes everything on your desktop and all mobile devices.
- Faster transfer speeds - More space makes little sense without more speed. Files transfer directly to the space monkey device at 10x the speed of other cloud devices.
- Extra secure data - All of your files are encrypted at the source and saved in two places: the cloud and your space monkey device. They'll be safe no matter what.
- Access from anywhere. Your space monkey files are reachable from any OS X, Windows, iOS, or Android web-enabled device. Basically, you can always get to your stuff.
